CAREER OBJECTIVE

Cybersecurity-focused BCA student with hands-on experience in ethical hacking, vulnerability assessment, and security-focused Python projects. Strong understanding of OWASP Top 10, network security, and cloud security fundamentals. Seeking entry-level roles or internships in Cybersecurity, SOC, or Security Engineering to apply practical skills and grow professionally.

EDUCATION

Bachelor of Computer Applications (BCA)

Centurion University of Technology and Management, Bhubaneswar (2024 – 2027) CGPA: 9.21 / 10

Higher Secondary

(12th – Science) Narayana School, Bhubaneswar (2024) – 57%

Secondary

(10th) St. Thomas Convent School, Balasore (2021) – 69%

INTERNSHIP

Cybersecurity Intern at TimesPro

- Conducting vulnerability assessments on cloud-based database systems using Nessus and OpenVAS.
- Studying and applying ISO 27001 and NIST security frameworks.
- Performing basic penetration testing, security audits, and log analysis for threat detection.

TECHNICAL SKILLS

Cybersecurity: OWASP Top 10, Web Application Security, Vulnerability Assessment, Network Scanning

Tools: Kali Linux, Nmap, Metasploit, Nessus, OpenVAS, Netdiscover

Programming: Python, Java, HTML, CSS, JavaScript, SQL, C++

Databases: MySQL, DBMS fundamentals, authentication, encryption concepts

Operating Systems: Linux (Kali, Ubuntu), Windows

PROJECTS

RUDRA – Hybrid AI Voice Assistant (Python)

- Built a cross-platform AI voice assistant with wake-word detection and task automation.
- Designed modular architecture supporting Linux, Windows, Android, and Raspberry Pi.

Hacker Library – Cybersecurity Learning Platform

- Developed a structured cybersecurity resource platform aligned with OWASP Top 10.
- Included beginner-to-advanced learning paths, labs, and practice material.

AI-Based Phishing Email & Link Classifier

- Built a machine learning model to classify phishing and legitimate emails/URLs.
- Applied data preprocessing, feature extraction, and model evaluation techniques.

Network Scanning & Metasploitable2 Lab

- Configured vulnerable lab environments for ethical hacking practice.
- Performed Nmap scans, network discovery, and vulnerability mapping.
